Profile

Front-end developer for 20 years, the last 12 on digital products. I specialize in component architecture and design systems for React, Next.js and Vue 3 apps with TypeScript, with experience in fintech, marketplace, e-commerce and mobile. I work from technical refinement with product teams to code standards and componentization, and I also build full-stack apps end to end with Next.js, TypeScript and PostgreSQL.

Experience

May 2025 – Sep 2026

Full-stack Developer · Imobanco

Remote · Vue 3, TypeScript, Python, Django, DRF

- Built the platform's receivables anticipation section, delivering the feature end to end on the front-end.
- Rebuilt the authentication flow: new login and a new authorization-password component used across the product.
- Delivered the new payer page and design system components, standardizing tokens and behavior across screens.
- Ran code reviews that caught business-rule errors before production, and led technical refinement with the product team.

2024 – 2025

Full-stack Developer (freelance) · Michael Instrumentos Musicais

Remote · Next.js, React, TypeScript, Prisma, PostgreSQL, Google Maps API

- Built solo, end to end, the brand's nationwide support network: service centers, retailers and sales reps on an interactive map.
- Google Maps integration and address geocoding, with combined filters by state, city and instrument category.
- Sponsored-artists module with public pages, plus a full admin panel: NextAuth, CRUD on DataGrid, image upload and cropping, rich text editor.

Apr 2021 – Apr 2024

Front-end Developer · SM Places

Remote · React, Next.js, TypeScript, Vue.js, styled-components, Laravel

- Merged the separate mobile and desktop versions of each marketplace theme into one responsive codebase, removing duplicated maintenance.
- Built middleware apps in React, Next.js and TypeScript, and custom themes on a Laravel/PHP app with Vue.js. Continued as a contractor from 2023.

Dec 2019 – Feb 2021

Front-end Developer · Ferreri / D3

Remote · React, React Native, styled-components

- Worked on MRV's new customer portal (financial management and real-time sales tracking), Clube do Prever tools and a React Native sales app.

Jun 2019 – Dec 2019

Full-stack Developer (freelance) · Coffee Roulette

Remote · Ruby on Rails, Sass, JavaScript

- Turned designs into responsive pages integrated into an existing Rails app. Client review: 5.0, “the best freelancer I have worked with.”

2016 – 2018

Front-end Developer (freelance) · I Am Action · Givdo

Remote · Rails, Ionic, Sass, PostCSS

- Rebuilt the front-end architecture of a nonprofit social platform and redesigned a hybrid charity quiz app.

2014 – 2016

Front-end Developer · Codeminer42 · EcoStage

Angular, Node.js, Express, MongoDB, Rails, React

- Maintained JavaScript legacy projects and worked across up to 6 concurrent projects with Rails and Node back-ends.

2006 – 2014

Front-end and Web Developer · Advertising agencies

PHP, WordPress, JavaScript, jQuery, Sass, MySQL

- Hundreds of websites, hotsites and multiplatform campaigns for clients such as SEBRAE/RN and UnP.

Own product

2026

Order management SaaS for bars and restaurants

Next.js, React, TypeScript, PostgreSQL, Prisma

Multi-tenant app for orders, inventory, delivery and automatic order printing, with dedicated interfaces for service, kitchen and courier on one codebase. Recurring billing, automated tests and CI.
